Enrolment No:	92500588046		
Student Name:	Booker A Tengbeh		
Subject	**ITECH**	**Academic Year**	**2025-2026**
Subject Code	**05BS0204**	**Subject Type**	**LAP MANNUAL PRACTICAL**

UNIT ONE (1)

1. Write html code to insert background to the webpage

2. Create a web page with appropriate content and insert an image towards the left hand side of the page when user clicks on the image, it should open another web page.

3. Create a web page showing an ordered list of names of the subjects, with nested list if any subject has been selected it should display the content of each subject

4. Suppose your company has three employees and you want to create a company “directory page” listing some information about each of them.

5. Write the HTML for that page and link 1 employee to another employee.

6. Write the HTML to make it possible for someone clicking the words ‘About the authors’ at the top of the page to skip down to a list of credits at bottom of the page.

7. Create an ordered list of stream and name of subjects. When user clicks on stream, it should open stream and when user clicks on subject name, it must display details of subject.

8. Create unordered list of menu of restaurant.

9. Write html code which allows the user to move within a same web page.

10. Write an html code to create a form to display complete detail of student including student name, city, stream, class, email id, gender using different list.

Answer

1. HTML Code to Insert Background to Webpage

```
<!DOCTYPE html>
<html>
<head>
<title>Background Example</title>
</head>

<body background="bg.jpg">

<h1>Welcome to My Website</h1>
<p>This page has background image</p>

</body>
</html>
```

---

2. Image on Left Side & Click Opens Another Page

index.html

```
<!DOCTYPE html>
<html>
<head>
<title>Image Link</title>
</head>

<body>

<h2>Click Image</h2>

<a href="page2.html">
<img src="image.jpg" align="left" width="200" height="200">
</a>

<p>This is sample content of webpage.</p>

</body>
</html>
```

page2.html

```
<html>
<head>
<title>Second Page</title>
</head>

<body>
<h2>This is Second Page</h2>
</body>
</html>
```

---

3. Ordered List with Nested List

```
<!DOCTYPE html>
<html>
<head>
<title>Subjects List</title>
</head>

<body>

<h2>Subjects</h2>

<ol>
<li>Computer Science
    <ul>
        <li>HTML</li>
        <li>CSS</li>
        <li>JavaScript</li>
    </ul>
</li>

<li>Mathematics
    <ul>
        <li>Algebra</li>
        <li>Statistics</li>
    </ul>
</li>

<li>Physics</li>

</ol>

</body>
</html>
```

---

4 & 5. Company Directory Page & Link Employees

```
<!DOCTYPE html>
<html>
<head>
<title>Company Directory</title>
</head>

<body>

<h2>Company Directory</h2>

<h3 id="emp1">John</h3>
<p>Position: Manager</p>
```

```
<p>Email: john@gmail.com</p>
<a href="#emp2">Go to Mary</a>

<h3 id="emp2">Mary</h3>
<p>Position: Developer</p>
<p>Email: mary@gmail.com</p>
<a href="#emp3">Go to David</a>

<h3 id="emp3">David</h3>
<p>Position: Designer</p>
<p>Email: david@gmail.com</p>
<a href="#emp1">Go to John</a>

</body>
</html>
```

---

6. About Authors Link to Bottom

```
<!DOCTYPE html>
<html>
<head>
<title>About Authors</title>
</head>

<body>

<a href="#bottom">About the Authors</a>

<h2>Welcome to Website</h2>
<p>Content of webpage</p>

<br><br><br><br><br><br><br><br>

<h2 id="bottom">Credits</h2>
<p>Author: John</p>
<p>Editor: Mary</p>

</body>
</html>
```

---

7. Ordered List Stream and Subjects

```
<!DOCTYPE html>
<html>
<head>
<title>Stream Subjects</title>
</head>

<body>
```

```
<h2>Streams</h2>

<ol>

<li>Science
<ul>
<li><a href="physics.html">Physics</a></li>
<li><a href="chemistry.html">Chemistry</a></li>
</ul>
</li>

<li>Commerce
<ul>
<li>Accounts</li>
<li>Economics</li>
</ul>
</li>

</ol>

</body>
</html>
```

---

8. Unordered List Restaurant Menu

```
<!DOCTYPE html>
<html>
<head>
<title>Restaurant Menu</title>
</head>

<body>

<h2>Restaurant Menu</h2>

<ul>
<li>Pizza</li>
<li>Burger</li>
<li>Pasta</li>
<li>Sandwich</li>
<li>Cold Drinks</li>
</ul>

</body>
</html>
```

---

9. Move Within Same Webpage

```
<!DOCTYPE html>
<html>
```

```
<head>
<title>Internal Links</title>
</head>

<body>

<a href="#section1">Section 1</a><br>
<a href="#section2">Section 2</a>

<h2 id="section1">Section 1</h2>
<p>This is section 1 content</p>

<br><br><br><br><br>

<h2 id="section2">Section 2</h2>
<p>This is section 2 content</p>

</body>
</html>
```

---

10. Student Form (Complete Details)

```
<!DOCTYPE html>
<html>
<head>
<title>Student Form</title>
</head>

<body>

<h2>Student Information Form</h2>

<form>

Student Name:
<input type="text"><br><br>

City:
<select>
<option>Rajkot</option>
<option>Ahmedabad</option>
<option>Surat</option>
</select><br><br>

Stream:
<select>
<option>Science</option>
