9. Write a program to create Navigation bar using CSS.

10. Write a two different paragraph in your HTML page and apply different formatting to both of that using external stylesheet

Answer

1. Text with Color Using Inline CSS

```
<!DOCTYPE html>
<html>
<head>
<title>Inline CSS</title>
</head>
```

```
<body>

<h2 style="color:red;">This is Red Color Text</h2>
<p style="color:blue;">This is Blue Paragraph</p>

</body>
</html>
```

---

2. Text with Color Using Internal CSS

```
<!DOCTYPE html>
<html>
<head>
<title>Internal CSS</title>

<style>
h1{
color:green;
}

p{
color:orange;
}
</style>

</head>

<body>

<h1>Internal CSS Example</h1>
<p>This is paragraph text</p>

</body>
</html>
```

---

3. Text with Color Using External CSS

index.html

```
<!DOCTYPE html>
<html>
<head>
<title>External CSS</title>
<link rel="stylesheet" href="style.css">
</head>

<body>

<h1>External CSS Example</h1>
<p>This is paragraph</p>
```

```
</body>
</html>
```

style.css

```
h1{
color:blue;
}

p{
color:red;
}
```

---

4. Use of Different CSS Selectors

```
<!DOCTYPE html>
<html>
<head>
<title>Selectors</title>

<style>

h1{
color:red;
}

.class1{
color:blue;
}

#id1{
color:green;
}

*{
font-family:Arial;
}

</style>

</head>

<body>

<h1>Element Selector</h1>

<p class="class1">Class Selector</p>

<p id="id1">ID Selector</p>

</body>
</html>
```

---

5. Image Opacity on Mouse Over

```
<!DOCTYPE html>
<html>
<head>
<title>Opacity</title>

<style>

img{
opacity:1;
}

img:hover{
opacity:0.4;
}

</style>

</head>

<body>

<img src="image.jpg" width="300" height="200">

</body>
</html>
```

---

6. 3x3 Table Color Change on Mouse Over

```
<!DOCTYPE html>
<html>
<head>
<title>Color Table</title>

<style>

td{
padding:20px;
text-align:center;
}

.red:hover{
background:red;
}

.green:hover{
background:green;
}

.blue:hover{
background:blue;
```

```
}

</style>

</head>

<body>

<table border="1">

<tr>
<td class="red">Red</td>
<td class="green">Green</td>
<td class="blue">Blue</td>
</tr>

<tr>
<td class="green">Green</td>
<td class="blue">Blue</td>
<td class="red">Red</td>
</tr>

<tr>
<td class="blue">Blue</td>
<td class="red">Red</td>
<td class="green">Green</td>
</tr>

</table>

</body>
</html>
```

---

7. Change Fonts and Style Using CSS

```
<!DOCTYPE html>
<html>
<head>
<title>Fonts</title>

<style>

h1{
font-family:Arial;
font-style:italic;
}

p{
font-family:Courier;
font-weight:bold;
}

</style>
```

```
</head>

<body>

<h1>Heading Font Style</h1>
<p>Paragraph Font Style</p>

</body>
</html>
```

---

8. Change Hyperlink Color Using CSS

```
<!DOCTYPE html>
<html>
<head>
<title>Link Color</title>

<style>

a:link{
color:red;
}

a:visited{
color:green;
}

a:hover{
color:blue;
}

</style>

</head>

<body>

<a href="#">Click Here</a>

</body>
</html>
```

---

9. Navigation Bar Using CSS

```
<!DOCTYPE html>
<html>
<head>
<title>Navigation Bar</title>
```

```
<style>

ul{
list-style:none;
background:black;
padding:0;
}

li{
display:inline;
padding:15px;
}

a{
color:white;
text-decoration:none;
}

</style>

</head>

<body>

<ul>
<li><a href="#">Home</a></li>
<li><a href="#">About</a></li>
<li><a href="#">Contact</a></li>
</ul>

</body>
</html>
```

---

10. Two Paragraph with External Stylesheet

index.html

```
<!DOCTYPE html>
<html>
<head>
<title>External CSS</title>
<link rel="stylesheet" href="style.css">
</head>

<body>

<p class="para1">First Paragraph</p>

<p class="para2">Second Paragraph</p>

</body>
</html>
```

style.css

```
.para1{
color:red;
font-size:20px;
}

.para2{
color:blue;
font-style:italic;
}
```
